

String Operations on Paths

(cmds: realpath, basename and dirname)

NarendraP

Learn How to Automate Common Tasks with **Bash** Shell Scripting

String Operations on Paths

- **realpath** : Converts each filename argument to an absolute pathname but it do not validate the path.
- **basename**:
 - Strips directory information
 - Strips suffixes from file names
- **dirname** : It will delete any suffix beginning with the last slash character and return the result

Thank you
